MAGNUM

METAL WORKING MACHINERY

Used Metal Working Machinery

The company endeavors to provide a **“one stop solution”** to customers looking for used machinery. Right from sourcing the most suitable machines for meeting customers' requirements, arranging inspection of selected machines to direct price negotiations, MAGNUM does it all. Further to ensure complete satisfaction to its customers to eliminate the problems usually associated with buying of used machinery, MAGNUM's team of engineers provide erection & commissioning services for these machines at customer's premises. This unique value added service is MAGNUM's USP. The company also keeps a ready stock of wide range of various used machinery for immediate delivery at its storage facility located near Kolkata and is proud to be associated in setting up a number of complete machine shops as per customer's requirements.

Machine Refurbishment & CNC Retrofitment

To cater to the ever growing demand of CNC machinery, MAGNUM has added a new horizon to their decade old experience of used machinery business. Upon requests by number of customers, a new division for refurbishment & retrofitment of both conventional & CNC machinery has been made fully operational. Led by a team of qualified and experienced engineers, MAGNUM provides customers the option of complete refurbishment and upgradation of their existing machinery.
